

## HOW THE WISE CHILD BOOK CAME TO BE

One day a mother was sitting in a big blue chair spending time with God. The mother was reading the book of Proverbs from the Bible and writing down what God was teaching her in a notebook. She read **Proverbs 12:18**.

*There is one who speaks like the piercings of a sword, but the tongue of the wise promotes health.*

Because the mother liked to draw, she drew a picture of what she was learning. It looked like this:

Her three-year-old son came walking by. He looked at the picture and asked his mom to tell him about it. So she took him up on her lap and explained the picture.

The next day, while the mother was sitting in the big blue chair spending time with God, her son came walking by again. He asked to see the picture again. Then he asked his mom to draw another one. So she drew a picture about another verse in Proverbs. Everyday her son came walking by and wanted to see the old pictures and have his mother draw new ones. His mother

decided that she needed to make a special time to show him pictures and draw new ones or she would NEVER get to spend time with God.

Soon there were so many pictures that it was taking too long to look at all the old ones and draw new ones. So the mother got a special notebook and put all the pictures in it. She put all the pictures that talked about the same topic together and put dividers between them with titles on them so that they could look only at one group a day. It was only then that the mother realized that God had given her a perfect way to teach her children. The mother called it **The Wise Boy Book** because she only had three sons and no daughters.

While her boys were young the mother would read from **The Wise Boy Book** every day. At times she would make new pictures to teach about different Scripture verses. When her boys had problems, the mother would draw a picture of the problem, then go to the Bible to find out what God wanted them to do. She would draw a picture of that and then add the picture to **The Wise Boy Book**. After many years, the boys became old enough to read the Bible for themselves and to spend their own time with God. Their mother looked at the pictures in **The Wise Boy Book**, drew them again nicely on drawing paper instead of writing paper. She made a new, nicer book called **The Wise Child Book** that could be shared with friends to teach both sons and daughters. Now the mother is a grandmother and has grandchildren who are reading **The Wise Child Book**.
